

PIVOT PROFESSIONAL LEARNING

BRINGING THE WORLD'S BEST IN TEACHING PRACTICE TO AUSTRALIAN SCHOOLS

“ Pivot has been invaluable - for my teachers to see real feedback from each of their classes, for me to understand the faculty's strengths and where we need to improve, and for our students who are becoming more invested in their own learning. ”

Maths Head of Department, Liverpool, NSW

AAMT Partnership

Pivot and the Australian Association of Maths Teachers are working together on effective maths teaching practice. AAMT institutional members receive a 10% discount on Pivot's RRP.

Student feedback is one of the most predictive and reliable ways to identify effective teaching practices.*

Our flagship student survey tool has been designed by teaching experts based on what the research tells us works, together with what schools tell us they need.

With the AAMT, Pivot now offers maths teachers specific questions to better understand their students' learning dispositions. Research shows targeting maths teaching to learning styles can improve student outcomes.

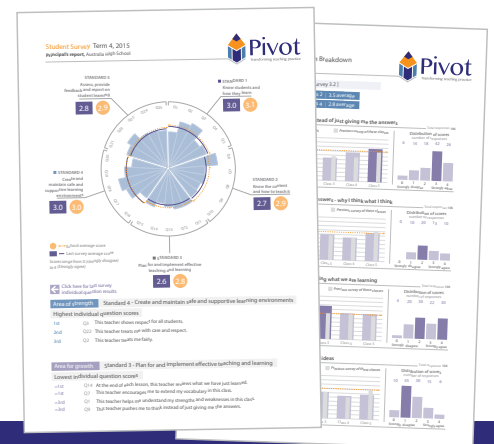

You will receive immediate, and easy-to-understand reports on strengths and development areas, against the AITSL standards.

- individual teachers receive confidential reports, broken down by each class they teach
- heads of departments and school Principals receive aggregated results reports, broken down in ways meaningful for them

Pivot's approach combines the power of student voice, with teacher self-assessment, classroom observation and goal setting tools and a growing resources library.

Pivot's comprehensive, flexible and information-rich system will support and reinforce your teachers' professional learning.

** Bill and Melinda Gates Foundation (2013), 'Ensuring Fair and Reliable Measures of Effective Teaching', Measures of Effective Teaching Project.*
