This is an agreement between the author or authors (hereafter referred to as "the authors") and The Australian Association of Mathematics Teachers (AAMT) Inc. with the following understandings:

1. The authors have full power to make this agreement.
2. The authors warrant that this is an original work that has not been previously published or submitted to any other publisher for publication.
3. The authors warrant that the work does not violate any existing copyright or license; it is understood that, where relevant, the authors have sought and been granted permission by the copyright owners to reproduce any material contained in the work to which the author does not own copyright.
4. The authors warrant that all statements made in the work are true, and are not libelous or unlawful; any instructions or suggested actions contained in the work, if followed, will not be injurious to the reader or others.
5. The authors warrant that appropriate approval has been obtained for the inclusion of any photographic images of children.
6. The authors will indemnify the AAMT against any claim, loss, injury, damage, cost, expense or liability occasioned to the AAMT by any claim, action or proceeding arising out of a breach or violation of this warranty.
7. The AAMT reserves the right to alter the text of the work or any included images or diagrams for the purposes of clarification or abridgement; also to remove or amend any passage which may be considered objectionable or likely to be actionable at law, without affecting the authors' liability.
8. The authors agree to transfer ownership of all copyright applicable to the work (except that to which the authors have no rights and have used with permission) to the AAMT, with the understanding that the AAMT grants to the authors a permanent, irrevocable, free, world-wide, non-exclusive license (including a right of sub-license) to use, reproduce, adapt and exploit the intellectual property in the work.
9. The authors may publish a digital copy of the work on their institutional website or repository, or on third-party research repositories such as Research Gate. AAMT will provide a PDF copy of the work as published upon request.

Signed and dated (by all authors)
